#### DESIGNED BY GIUGIARO

## PRISMA

#### Accuracy at every step.

**PRISMA** stepper motor-driven dosing pump has been designed by EMEC to be the best solution for offering high-accuracy metering and extreme reliability.

Thanks to the new stepper motor and to the MultiFunction software, **PRISMA** dosing pumps offer complete control over dosing speeds and working modes as well as great flexibility, meeting even extremely complex application needs.

PRISMA also boasts Level control, Alarms and Standby, while available working modes include Constant, Constant with external input, ppm, %, mlq, Pausework, Weekly, mA, Pulse, Volt, external Batch and manual Batch.

#### TURNDOWN

**PRISMA** stepper motor-driven pumps give you the most accurate control over the stroke speed, providing an outstanding turndown ratio of up to **4800:1**.

It means **PRISMA** can split up the dosing process into a maximum of **4800 steps** in order to offer the most homogeneous and precise distribution of the product to dose according to the required application.

### SLOW MODE

Extreme versatility of **PRISMA** dosing pumps is also due to **Slow Mode** function.

With Slow Mode enabled you can reduce the suction speed from **100** to **1%** of the normal speed, making easier and more reliable the priming and the dosing even when you have to work with particularly viscous liquids.

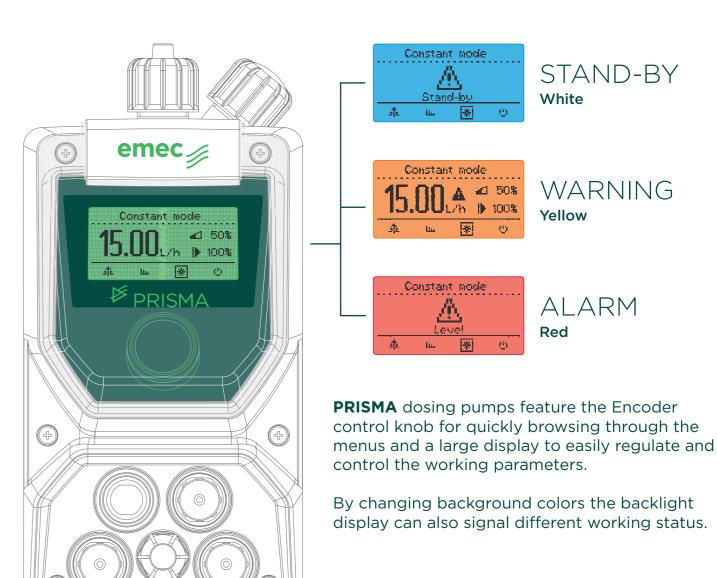

### CAPACITY RANGE

PRISMA stepper motor-driven pumps are available with dosing capacity of

1	l/h	2	l/h	5	l/h	7.5	l/h
20	bar	25	bar	20	bar	16	bar
0.3	gph	0.5	gph	1.3	gph	2	gph
290	psi 3	62.6	psi	290	psi	232	psi
